

SIP Trunking

Unlimited On-net Calls

When your office calls any other 1-VoIP customer whether business or resident, your calls are FREE and UNLIMITED. This works with any combination of 1-VoIP services. There is no additional equipment, extra calling plan or software required to take advantage of the savings.

Unlimited Call Paths

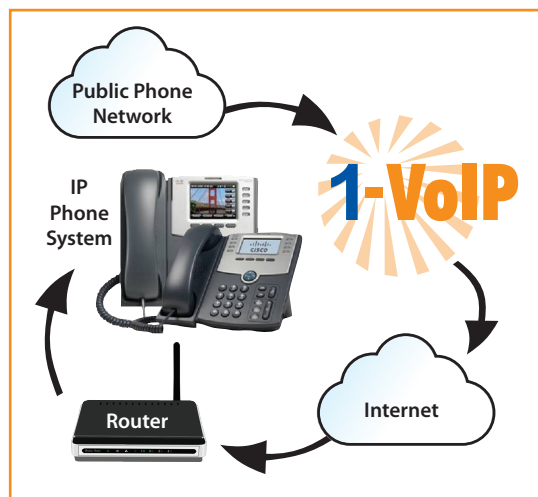

Unlike traditional phone lines and other VoIP providers that allow one call path per line or trunk, 1-VoIP SIP Trunking offers the versatility of UNLIMITED inbound and outbound calls. Because of 1-VoIP, you never miss a call and your customers never get a busy signal.

Virtual Numbers

1-VoIP SIP Trunking allows your business to add multiple phone numbers with multiple area codes. This can mean local access numbers for your customers nearly anywhere in the U.S and even certain International countries.

Network Reliability

With a triple-redundant network provided by multiple Tier 1 providers located in each data center, feel the strength of a nationwide network that has been built from the ground up with disaster recovering in mind. With more routes and more data centers geographically placed throughout the U.S, small to large enterprises trust 1-VoIP.

Scale

1-VoIP SIP Trunking service was built with your business in mind. Your business can utilize the full extent of the network as your business grows or scale back during non-peak periods. You never have to pay for capacity, you don't need.

Easy & Simple

1-VoIP SIP Trunking connects to your IP-enabled PBX system to the Public Switched Telephone Network (PSTN). 1-VoIP delivers high definition (HD) digital voice service nationwide and is compatible with Tier 1 providers to ensure the highest call quality possible, every time.
